I-WORK

Sunón

It is not a simple change,
but a kind of **evolvment...**

Health concept is reflected in the rise and fall

Work should not be the shackle of health. The sub-health status must be effectively improved.

I-work lifting function completely helps to get rid of the immutable working status, and scientifically change the working postures and make staff keep vigorous and healthy. Enjoy nature and health is the driving force behind I-Work design.

It is not a simple change,
but a kind of **evolution...**

Scientific Convenient and Fast

Through office behavior simulations among different ages, heights and genders, I-work can ascend and fall between 740mm and 1,200mm freely. So staff can adjust to the best status of sitting and standing for working as they wish. Being quick, silent and convenient, I-work lifting function brings about relaxing, efficient and pleasant office feelings.

Unique Structure and Minimalist Shape

UNIBODY technology is often used in the automobile field and electronic equipment field on behalf of the most advanced production technology. It's a kind of one-off process, maintaining neat appearance and ensuring the firm structure with the fewest spare parts. For example, MacBook is representative of UNIBODY. I-work is profoundly conversant with characteristics of UNIBODY, and adopts a unique connection method, making I-work without any visible screw, which deeply interprets the minimalist style and modern fashion sense.

Considerate Memory Function and Humanized Design

I-work has a built-in memory button which can automatically memorize the desk heights for sitting and standing. With a slight press, it will be automatically adjusted to the optimal office status, which is not only efficient but also considerate. Each detail and each function such as, integrated routing, touch drawer and wireless charging of the desk conveys the ultimate pursuit of humanized care.

Dynamic Sense of Beauty and Tidy Space

I-work meeting desk series adopt the design of no edges and corners, thus adding the sense of fullness and dynamic beauty.

The walnut wood desk is deftly embedded with the press-bounce wire box, making the wiring system under the desk more neatly and orderly.

In the Internet era, success depends on efficiency. I-work executive desk meeting space allows small "communication meetings" to be held anytime and lets inspirations and creativity constantly burst out amid collisions.

I-work negotiating desk follows the consistent conciseness and texture. The one-square-meter exquisite negotiation platform can bring participants closer to each other and communicate easily.
