NATURAL JOY

Sunón

Release “Office Output” in Space of Joyous Nature

When space effectiveness ascends to be an important measure of office efficiency, what is cherished the most? The answer is space flexibility and people's control over objects. Natural Joy series is developed based on these ideas to achieve harmony among people, space and development. With its numerous combination possibilities, Natural Joy helps create a comprehensive office system featured by "Concentration & Collaboration".

With its thoughtful and user-friendly design details, Natural Joy gives employees a feeling of being cared for. Working engagement and workplace satisfaction can be enhanced. When the environment imposes no restriction, initiative and creativity are expected to increase in a significant way: "office output" can be further released, which facilitates healthy development of enterprises in the long run.

CHAPTER

one.

**Independent Office Space,
Immerse in Work**

Dual-Purpose Storage—Sufficient and Convenient

Upgrade underdesk storage with the open shelf cabinet of Natural Joy! The upper shelves are perfect to place books, documents, and tools of frequent use. The bottom lockable drawer ensures sufficient privacy and the shelf alongside has a two-shelf height for large-size objects. The bottom shelf elevation frees the cabinet from moist and dirt. Clear, convenient, and neat.

Concise yet Exquisite Details: Leadership Climate

Sometimes less is more: less decorative elements in product appearance, more emphasis on space applicability. One color is used as the dominant color while another appears partially as a harmonious match, making the space neat and elegant. Natural Joy reflects a crucial tenet: Furniture is indeed the server of people and spaces.

Heightened Side Panel, More Vertical Storage

When more storage space is required, why not choose a heightened side panel? Two multiuse peg boards with included hanging trays can be mounted on the top of the panel for offices tools, books, and documents. They are more visible and touchable in vertical storage, and more space on the desktop can be saved for further use.

The desktop is equipped with a press-and-popup socket where users can find sufficient room for two/three-pin and USB plugs.

Dual Mode: Independent Working and Co-working

The Natural Joy independent workstation is connected in all parts, suitable for focused individual work and can be easily combined into co-working stations for two or more people. It allows flexible switch between different working modes, making working more efficient.

Mobility Cabinet, Be There as You Wish

Furniture design should be user-oriented. This mobility cabinet with a drawer and open storage can be moved freely under the desk to adapt to different use habits. It can also be used as an independent cabinet for magazines and potted plants.

Storage accessories can be hung on the side panel top for sorting and storing office objects, saving desktop spaces for further use.

Mountable Boxes for Refreshing Potted Plants

Green plants in office can increase working efficiency by 15% according to a survey comparing dull and colorful spaces. Fresh and colorful plants add vitality and liveliness to office environment, which facilitates in relieving the work pressure and eye strain of employees, and reboots the body system with higher working efficiency.

Heightened Cabinet, Enlarge the Storage Capacity

When the desktop is fully used, what else can be done for more storage place? The heightened cabinet is designed with one more drawer and its top for placing some decorations or plants. All wires are concealed inside the desktop, maintaining the overall neatness.

Routing system is concealed inside the desk to obtain overall neatness.

High Desk for Sit-to-Stand Working

According to statistics, people spent 50%~70% of the working hours sitting, resulting in back and neck pain, and repetitive stress injury. Sit on a high stool matched with Natural Joy high desk can help promote blood circulation in lower limbs and relieve sedentary stress. With body feeling more comfortable, working engagement can be improved.

The drawer and the top shelf are perfect to place documents, books, and bags.

Feet rest design offers comfortable support in both standing and sitting gestures.

The side cabinet with a large capacity is sufficient in sorting and storing objects.

CHAPTER

two.

**Composite Office Space,
Ecosystem for Collaboration**

Team Cooperation Mode
Supervisors and Employees, United as One

The growth of a team requires the concerted efforts of both supervisors and employees. Sitting together, they communicate, cooperate with each other, assign works and supervise efficiency so there are free exchanges of inspirations; also, the time needed for conveying information, making a decision, monitoring progress and sending feedback will be greatly shortened.

Real-time Communication Mode A Combination of High and Low-talk Whenever You Want

The set-up of high-and-low work station inspires the automatic exchanges among employees in a frequent rate. The interaction offers an optimized solution to office communication system. When off-the-cuff dialogue occurs, they simply rise from low desk and chat at high desk. Low desk allows concentration while high desk enables short talks. Two work modes can be realized in a much more convenient way within one space.

Leisure & Work Mode A Relaxation Area that Brings Us Together

The happiness of employees requires involvement of social and leisure activities during work. With sofas involved, we transform part of space into a leisure or free-talk area, where employees can get away with work, take a sip of coffee and have free chats. Spirited and energized, workers lift their output and thus a benign cycle is formed.

Hill-shaped Screen Ascends for Creative Use

The screen absorbs the lines of the Alps hills and is decorated with wave point art of Yayoi Kusama. A screen can also be a work of art. Rubber band can be used to create a storage-display area.

Versatile screens meet various space matching requirements of modern offices.

Frosted glass screen

Laminated glass screen

Sheet melamine screen

Sheet upholstered screen

Collaboration Vs. Concentration? Just Move Screens!

The flexible assembling and disassembling of partition screens find a balance between team-work and self-work, saving the slightest moving of personnel. Workers can move from one mode to another by simply sitting at their positions. The horizontal screen identifies a specific area in an open environment whereas the vertical setting or removing of screens permits face to face discussions.

Brainstorming Mode Extension Board at Hand, Small Discussion with Ease

Collective discussion and decision may occur at any time, while a meeting room is not always within reach. The interconnectivity of Natural Joy's conference table panels invokes nearby cooperation. High and low conference tables can be added to work desk and partition cabinet to form a mini chatting area, benefiting fast inspection of plans among a group of 3 to 5 persons. Every individual's time is priceless. The time spent on booking and waiting for a meeting room can be used on things much more meaningful.

Partition cabinet not only takes in public items and brings an orderly environment, but also creates borders.

Release Office Output in Space of Joyous Nature

With its complete functional modules and cost-effective performance, Natural Joy series serves as an office space solution package to meet comprehensive needs of developing corporates: high space utility, modular management, future scale expansion, and innovation and collaboration. Natural Joy releases office output to the maximum extent.

CHAPTER

three.

**Cost-effective
Employee Desk: Cater to Start-ups**

Simple Design with Complete Functions

With Natural Joy, it is no long a challenge to obtain both space aesthetics and personality needs with limited space and budget. Based on principles of a functional wiring system, a clear order and a simple space, designers insist the normal customs of "durable, flexible and practical" features of office. With storing, aesthetics requirements, durability, practical large-desktops all rolled into one, the spark of entrepreneur business can be felt everywhere.

One-style-fits-all? Yes!

Development is an eternal topic for enterprises. For incipient and tight-budgeted companies, both economic performance and capacity to embrace the expansion of team should be taken into account. A minimal and immaculate style accompanied by a homely wood-based color tune accommodates to any styles, creates a harmonious and pleasant development system, and drives the burst of inspirations.

Customized 100m² scientific style space

Collaboration workstation

It's quite popular among electronic-gaming and IT industrials with its clean and tech aura. Composite working modes satisfy needs of numerous meetings, multiple changes, and instant discussions in these industries.

Concentration workstation

A conscientious and independent mode is commonly seen in account, administration and law departments; Simplistic white together with moderate wooden color presents a bright tune, suitable for gloomy spaces or spaces with limited area.

Customized 200m² Ins style space

Collaboration workstation

Heart-warming and lively design elements deliver home-like coziness in work space, creates a relaxing environment for communication and enhances influx of ideas. It represents the new trend of workplace for advertisement design, maternity, E-commerce industries and so on.

Concentration workstation

A clear division of spaces in a relaxing atmosphere helps with individual creation. It allows less disturbances in a public environment and propels self-involvement in creation; the division of meeting area also correspondsto the using frequency of small businesses.

Click with Configuration of Start-up Teams

Extension Design + Enlarged Space

In response to the development requirements of teams, Natural Joy upholds the design principle of "basic configuration combined with free extension", making flexible adding and deduction to space.

Traditional long desk (48 people)—
1200mm wide, no personal storing space, sitting mode only

Natural Joy small space solution (56 people)—
1036mm wide, be matched with systematic storage accessory and long desk

+ 17%

Compared with traditional long office desks, Natural Joy makes better use of space and allows incessant development if necessary. With the help of it, a space can accommodate 17% more workers. It offers a human-oriented atmosphere and cares a lot about physical and mental health of employees.

Concentration mode
