UP1- Initiate a sit-to-stand campaign

Duple smoothness

In a post-pandemic era, modern employees' daily lives have experienced subtle yet conspicuous changes. Go to work by bike, practice yoga during a break, stand up and walk around frequently... today's employees care about their health more than ever before. In fact, a sit-to-stand campaign is simmering.

As an executive, Richard used to live a sedentary life. Now, he prefers to talk to employees while standing up; beside a dual-desk set, a document was passed to Tom and got stamped instantly; Lucy, who sits in front of an L-shape desk, got inspirations after doing some stretching exercises; Amber, who suffered a lot from neck pain before, found herself quite obsessed with the 120-degree lift desk.

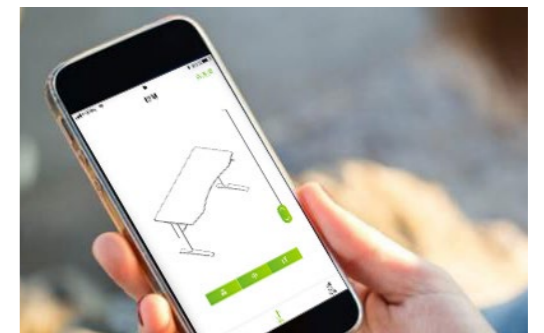

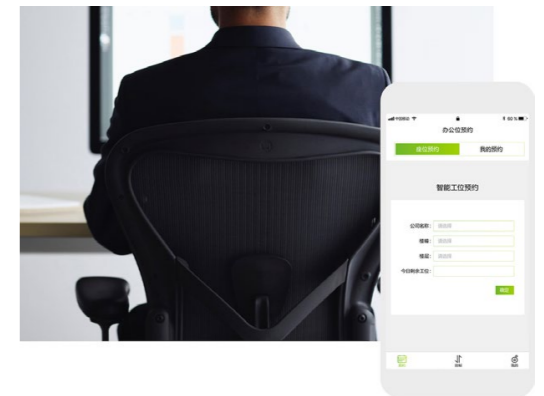

Sit-to-stand working model, get rid of sub-health, and lead a new era of 5G working.

Dual-control system

Bring synchronized data and agile response

Hand-control via high definition LED screen; Mobile-control via smart APP, remote control within a distance of 10m. Synchronized data to reach designated height. Multi-level lift to bring a healthy body, and high productivity.

3-level memory height

Set preferred heights for sitting and standing postures from now.

Silent lift

< 46 dB, minimize office noise and focus on work.

Reach within 13s

With a speed of 30-38mm/s, UP-one achieves the designated height within 13s, indulging you with a quick response.

Retreat upon obstacle

Automatic ascend or descend when there is an obstacle.

Sit-to-stand

Boost office health

Evidence shows a short-term standing helps to boost blood circulation, burn redundant calories, and foster the process of metabolism, while lengthy-standing increases risks of back pain and fatigue. As a result, it would be better for us to change our postures from time to time. UP-one lift desk reduces the sedentary period by 60% and facilitates transitions between sit and stand, thus ensures a healthy work style.

One-set dual-desk: enliven procedure-based work

According to surveys, finance/administrative staff suffer most from sedentary working, as heads-down work is quite normal because of the nature of their jobs. UP-one's one-set dual-desk system allows two people to sit together. It is also capable of being extended continuously on this basis, catering to the needs of teamwork.

120° grand desktop

Show your capabilities

Curved edge allows free stretching of your arms on both sides; 1400mm-long, 750mm-deep desktop is broad enough for you to lay drawings; sit-to-stand design draws an outburst of inspiration.

Synchronized lift of 3 legs; Grand desktop displays generosity.

Independent routing & partition screen: focus on work

A messy routing tends to distract your thinking, while a lift desk usually has a much more complicated routing system than regular desks. UP-one newly adopts hidden routing columns to provide a safe knee clearance. Screens are optional to build a semi-private environment for concentrated work.

L-shape lift desk

L-shape lift desk: foster flexible teamwork

As the business develops, an increasing number of projects are undertaken by teams. In this sense, the sit-to-stand desk is not only a fashion trend for the young but also a smart choice for health-chasers. Available in different combinations, UP1 easily accommodates to different spaces and team adjustments.

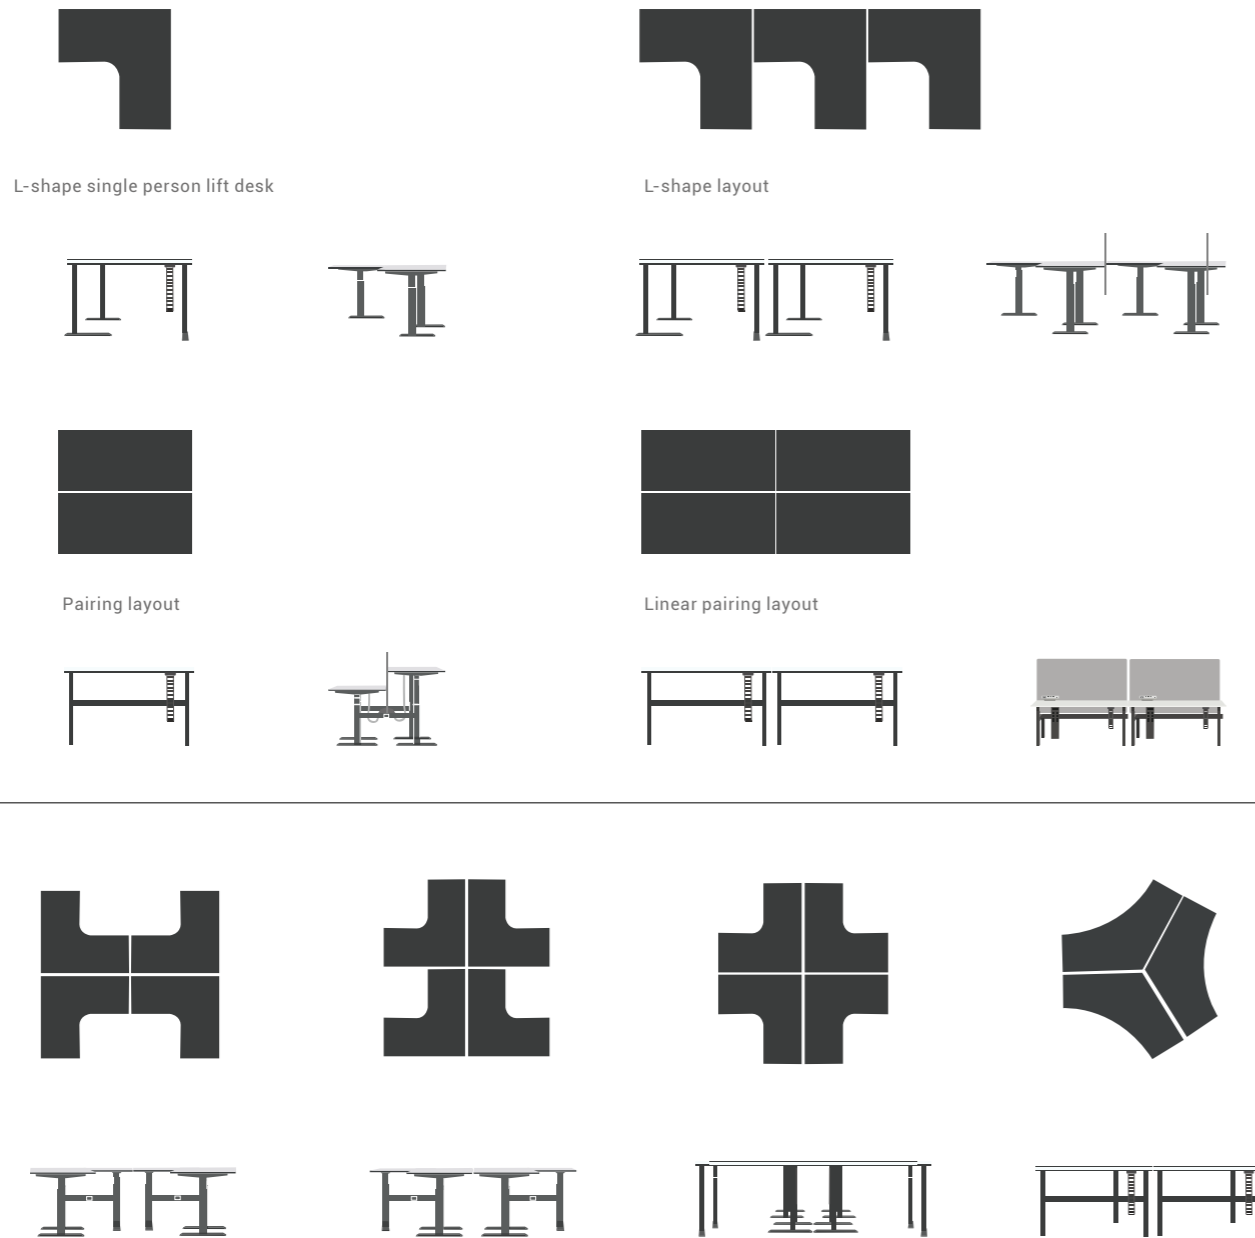

Contemporary minimalist style steel frame

The lower frame of the lift desk uses cold-rolled steel, which is stable and durable. It is available in three colors: Matte White, Matte Black, Meteor Grey. Elegant colors together with lifting dynamics inject a slew of vibrancy to your space.

Standard worktops

Combinations

Smart APP

Dual-motor lifting system

Crossbeam routing system

Dual-desk routing system

Independent routing system

Desktop in 7 colors

underdesk shielding panel

American standard/British standard/Australian standard/European standard/Chinese standard

UP1 routing system

1. Grounded power cord goes through routing columns and beams to supply power to extension desk, with wires fully hidden inside;
2. 86mm*86mm socket holes are pre-reserved on the side surface of routing beams, with at most 3 sockets available on each side;
3. Wires of lifting motor and power strip can be stored inside the snake tube.
